Operation Manual

Thank you very much for buying SHOW UP product.

SHOW UP Neon Color consists of two-component coating and its ingredients are different from imports so that it stops color steps much more than conventional other neon products even though general neon color tends to be thought of as a color that easily causes color steps.

Base color should be white if you focus the coloring and base color should be similar colors if you mind color steps

1. Take a choice the number within of 500~800 of sandpapers for finishing the surface preparation.
2. Paint the base color after finishing the surface preparation. It is ordinal to take a choice white color because of preventing color steps. But the light stability will be much better and you can avoid risks like color unevenness to paint the similar colors as the base color.
3. Paint Neon Color after painting the base color. Finish spray painting Neon Color approximately 3~5 times because it is good of the concealment. Neon Color is one set of Neon and hardner. 85% of Neon and 15% of hardner have to be diluted by urethane thinner of 20~30% of Neon.
4. Finish painting Neon Color and paint top coat clear.
5. Polish a surface clean as usual after it dries.

dilution ratio of 1Kg set of Neon Color

Neon	Hardener	Urethane thinner
850 g	150g	20~30%

Cautions
