USER INSTRUCTION

Thank you for purchasing DIVA Kandy. Please read this instruction manual carefully before use and enjoy our newly shiny light-resistant color.

1. Pre-condition with usual preparing product and sand down with 500~800 grid to finish re-surfacing.
2. Apply Base Color after pre-conditioning. Not only using silver base enhances the light resistance but also it helps to avoid the risks of uneven coloring.
3. DIVA Kandy is highly concentrated paint product and therefore use dedicated binder to dilute before applying.

You may use 1K or 2K to dilute for regular use. Wait 5-10 minutes at each application / spray interval.

Due to Diva Kandy contains color additive pigment, if heavily painted / sprayed or not diluted well, it may cause color to dull.

Moreover, if diluted rate is too high and painted repeatedly, it may result the color to dull as well.

4. Use Topcoat to finish after applying DIVA Kandy.
5. After dried, polish to finish as usual.

Precaution

Get medical attention immediately, in case of feeling sick, ill, unwell while using the product. Promptly wash eyes with plenty of water if inhaled or get in the eyes. Get medical help if irritation continues. Wear protective clothes such as masks, protective gloves and avoid inhaling the vapor for a long time. Keep the product in the cool place in order to avoid fire hazard.

Mix rate against binder 1000g

DIVA Kandy	Designated DIVA binder	Designated DIVA thinner
20~80g	1000g	100~150%
